Our 2018 Gender Pay Gap Results

Published 29 March 2019

A Message from our General Manager

In 2017, the UK Government introduced new legislation requiring all employers with 250 or more employees to report, on an annual basis, statutory calculations showing particular pay information by gender. This is our second report and presents our 2018 Gender Pay Gap Results.

We continue to be committed to maintaining a culture of inclusion in which people from all backgrounds can fully contribute to the growth and success of our business. Attracting, developing and advancing diverse talent at all levels is critical to our business and is an essential element of our inclusive, innovative workplace.

Tim Sheppard
*SVP & General Manager,
Northern Europe*

At a Glance

Our Gender Pay Gap Disclosures

The table below summarises our gender pay results for all IQVIA™ UK businesses.

Pay and Bonus Gap

	Difference between men and women	
	Median	Mean
Women's hourly rate is:	23.4% (lower)	25.2% (lower)
Women's bonus amount paid is:	43.6% (lower)	53.5% (lower)

Proportion Receiving Bonus Pay

What These Results Show

The gender pay gap law measures the difference between the average earnings of all male and female employees, irrespective of their role or seniority. It does not reflect equality of pay for equal roles.

The following chart shows the gender distribution (balance of female and male employees) and corresponding pay gap in our business across four equally-sized pay quartiles, each containing approximately 900 IQVIA UK colleagues.

Pay Quartiles

Statutory Disclosures

Our Legal Entities

IQVIA UK held more than ten legal entities during the 2018 gender pay gap reporting period. Under the UK Government's regulations we are required to report certain gender pay information for all entities with 250 or more employees. We have, however, chosen to voluntarily report on all our legal entities regardless of the number of employees.
